Thirty years working within the business, an unwavering commitment to employees and strong support of the local community have led to the coveted East Cheshire Chamber Business Person of the Year award win for Darren Hesketh, Managing Director of Diamond Electronics.

Darren, a well known and popular member of the local business community, was recognised particularly for his strong leadership of Diamond Electronics during recent recession years, the results of which saw Diamond Electronics achieved its strongest trading figures to date in 2010 with a turnover increase of 42% since the darkest days of the recession in 2009.

Much of Darren's spare time is given each month on a voluntary basis to support community initiatives; he is a founder member of the Congleton KISS group (Knowledge, Information Sharing and Support), was a judge in the Young Enterprise competition last year and sits on the board of the South Cheshire Careers Academy

“It's fantastic to be recognised by the Chamber in this way” commented Darren “and I'm delighted to receive the award, which I am proud to accept on behalf of the team who have been hugely involved and supportive in making 2010 such a successful year.”

Diamond Electronics employs 43 staff most of whom live locally. The business specialises in the supply of electronic components, human machine interface components and procurement management services to original equipment manufacturers and contract electronic manufacturers in both the UK and Europe. Their latest division Diamond LED Lighting markets an extensive range of energy saving LED lighting products designed for retrofitting in commercial and domestic applications.

ENDS

Notes to Editors

Diamond Electronics is based in Smallwood, Cheshire and specialises in the supply of electronic components to original Equipment Manufacturers and Contract electronic manufacturers in both the UK and Europe. The product range has expanded in recent years to include human machine interface components (www.diamondhmi.co.uk) as well as a range of procurement management services geared to reducing the overall cost of electronic component purchasing, (www.diamondksd.co.uk).

The Diamond LED Lighting division markets an extensive range of environmentally friendly retrofit LED lighting solutions for domestic, commercial and industrial applications. LED lamps can save over 80% of running costs and last up to 10 times longer than existing incandescent and halogen lamps.

Further information about Diamond Electronics can be found at www.diamondelec.co.uk and www.diamondledlighting.co.uk
